GeoData Random Sampler Release Notes

1.3.6 for 10.2.1 (6/24/2016)

- #122233049 - Error with qualified name for SQLServer databases

1.3.4 for 10.1.x (11/13/2013)

1.3.3 for 10.0.x (5/7/2013)

1.3.1 for 10.0 SP 5 (04/29/2013)

- Added: Site Licensing Option

1.3.2 for 9.3 (11/17/2011)

- Fixed: Unnecessary selection of feature with definition queries in the select set being sampled.

1.3.1 (11/14/2011)

- Added: Most recent updates of network license manager executables and dlls.
- Added: Fail over capability to configure up to 4 license servers, as well as timeout setting.
- Fixed: Erratic zooming when stepping through a sample.
- Fixed: Unnecessary display of the "View Attributes" window when stepping through a sample.
- Fixed: Added back the "Select Features" button to the sample dockable window.

1.3.0 (8/29/2011):

- Added: Support for ArcGIS 10

1.2.1 (1/5/2011):

- Added: As a user, I can sample from a selected set of data.
- Added: As a user, I can sync the sample row to a selected feature in the sample data grid.
- Added: As a user, I can select all of the features from the current sample.
- Fixed: When sorting a column in the data grid, the selected row position is persisted, causing unexpected zooming.
- Fixed: When there are no layers in the TOC, the about does not open.
- Fixed: When switching from one sample to another, the first row in the sample cannot be zoomed to.
- Fixed: CSV reporting when a single row in the sample is corrupt.

1.1.2 (09/14/2009):

- Fixed: Unable to connect to GDRS table if connection owner not the same as table owner in Oracle.

1.1.1 (09/09/2009):

- Fixed: Unhandled Exception when a Feature class in the TOC has a broken data source
- Fixed: Fails to zoom to/show attributes of a feature.
- Fixed: Unable to delete an error type.
- Fixed: Unable to create a sample if a ShapeFile exists in the TOC.
- Added: As a user, I can view the GDRS table details so that there is no confusion about where the samples are being persisted.

1.1.0 (07/30/2009):

- Added: As a user, I can create a single sample that includes one or more feature layers in my map.
- Added: As a manager, I can export the contents of the manage samples view to a CSV file.
- Added: As a manager or user, I can see when my sample was created.
- Fixed: Using Field Alias instead of Field Fullname in UI and Export.
- Fixed: When selecting Advanced Export, the first field in the Select Fields window is always selected.
- Fixed: When a user selects a sample row via the key board, the map is not updated with the newly selected row.
- Fixed: Unable to easily edit error comments once you click to another comment cell.

1.0.0 (07/08/2009):

- Added: As a user, I can install either an Enterprise or Personal version of the product.
- Added: As a user, I can upgrade my license from Personal to Enterprise allowing me to later upgrade if later need to connect to SDE.
- Added: As an administrator, I can supply X number or unlimited number of licenses to my users.
- Updated: License permissions based on Enterprise or Personal.
- Updated: Help for Version 1.0.0.
- Fixed: Rejection Size is not set for statistical Samples in the Random Sample Grid UI.
- Fixed: Sample Break Point does not break correctly.
- Fixed: When creating a Sample the UI allows me to enter values for both Absolute and Percentage, these should be mutually exclusive.
